## Submit a proposal

# Play for Nature is funding you

**You are a biodiversity conservation NGO and would like to submit a project to be financed?**

**Find below our calls for proposals and how to apply!**

Every year, we provide technical and financial support to associations that carry out biodiversity conservation projects on the four continents.

These projects can take different forms but must always keep in their center the biodiversity conservation objective as well as the awareness of the local populations concerned by the project.

We fund two types of projects :

- Biodiversity conservation projects such as fauna and flora monitoring, scientific studies, reintroductions of individuals... with a share of awareness through information meetings, campaigns and education programs in schools.
- Biodiversity conservation projects using sport and the organization of sporting events as a tool to raise awareness of populations and vector of key messages for biodiversity conservation.

## WHO ARE WE

BK

through the practice of sport, the organisation of a sporting event and raising awareness among local people.

Two levels of financial support are available: grants of **€5,000** and grants of **€15,000**

- Biodiv'Sport : **2 grants of €15,000** and **14 grants of €5,000**.
- Biodiv'Monde : **2 grants of €15,000** and **5 grants of €5,000**.

Technical support will be provided to project sponsors throughout the project, in particular to help them organise an awareness-raising sports event.
