Persetujuan <i>Approval</i>	Dr. Ir. Setiawan, MS	Koordinator RMK Course Cluster Coordinator		
Penetapan <i>Determination</i>	Dr. Kartika Fithriasari, M.Si	Kepala Departemen Head of Department		

# MODULE HANDBOOK

## STATISTICAL MACHINE LEARNING

Module name	STATISTICAL MACHINE LEARNING		
Module level	Undergraduate		
Code	SS234526		
Course (if applicable)	STATISTICAL MACHINE LEARNING		
Semester	5		
Person responsible for the module	Dr.rer.pol. Dedy Dwi Prastyo, S.Si, M.Si		
Lecturer	Dr.rer pol. Dedy Dwi Prastyo, S.Si, M.Si Dr. Dra. Kartika Fithriasari, M.Si		
Language	Bahasa Indonesia and English		
Relation to curriculum	Undergraduate degree program, mandatory, 5th semester.		
Type of teaching, contact hours	Other SCL Methods (87.5%) Non-SCL Methods (12.5%)		
Workload	1. Lectures[L]: $2 \times 50 = 100$ minutes per week. 2. Practicum in Laboratory [P]: $1 \times 150 = 150$ minutes perweek 3. Exercises and Assignments [EA]: $3 \times 60 = 180$ minutes (3 hours)per week. 4. Independent learning [IL]: $3 \times 60 = 180$ minutes (3 hours) perweek.		
Credit points	3 credit points (SKS) Equivalent to 4.8 ECTS		
Requirements according to the examination regulations	A student must have attended at least 80% of the lectures to sit in the exams.		
Mandatory prerequisites	-		
Learning outcomes and their corresponding PLOs	CLO-1. Understand and able to explain the concept of supervised and unsupervised in machine learning and its application in various fields. CLO-2. Able to identify, formulate, and solve statistical problems using machine learning. CLO-3. Able to apply computing techniques and to use modern computer tools/software used in machine learning for clustering. CLO-4. Able to apply computational techniques and to use modern computer tools/software used in machine learning for predictions of regression and classification. CLO-5. Able to apply computational techniques and to use modern computer tools/software		PLO-2 PLO-7 PLO-8 PLO-9 PLO-10

	<p>used in machine learning for time series forecasting.</p> <p>CLO-6. Able to write a written report of the analysis obtained from project.</p>	
Content	The Statistical Machine Learning (SML) course equips students to master the latest developing methods and algorithms that are used to make computers capable of learning and behaving intelligently. This lecture will discuss theory and practice for the latest methods and algorithms with topics including unsupervised learning and supervised learning methods/algorithms for regression, classification, and time series forecasting.	
Assessment and its weight	<p>Assignment 1 (20%)</p> <p>Project 1 – Midterm Exam (20%)</p> <p>Assignment 2 (20%)</p> <p>Project 2 – Final Exam (40%)</p>	
Media employed	LCD, whiteboard, websites (myITS Classroom), zoom

	<i>regression and classification.</i>	<i>other ML Methods</i> <b>4.8 Can solve classification cases using the SVM method, Random Forest, and other ML Methods</b>					
	Dapat menggunakan <i>software</i> (terutama <i>library</i> di <i>open source</i> , misalkan di R) untuk klasifikasi menggunakan SVM, Random Forest, dan Metode ML lainnya  <i>Can use software (especially libraries in open source, for example in R) for classification using SVM, Random Forest, and other ML Methods</i>	Observasi, Aktifitas di Lab <i>Observation, Activities in the Lab</i>	Praktikum  <i>Practice</i>  <b>P: 4 x 1 x 170"</b>		Menerapkan JST menggunakan <i>software</i> dan <i>coding</i> pada data  <i>Implementing ANN using software and coding on data</i>	10% / kum 70%	
13-14	CPMK-4. Mampu menerapkan teknik komputasi dan menggunakan perangkat komputer modern yang diperlukan dalam <i>Machine</i>	4.9 Dapat mengidentifikasi permasalahan regresi yang diselesaikan dengan SVR, Random Forest,	Tes lisan, observasi Aktifitas di kelas <i>Oral test, observation Class activity</i>	CILSD, PBL  <b>TM: 2 x 2 x 50" PT: 2 x 2 x 60" BM: 2 x 1 x 60"</b>		8 Membangun arsitektur JST untuk regresi  <b>8 Building ANN architecture for regression</b>	5% / kum 75%

	<p><i>Learning</i> untuk prediksi pada permasalahan regresi dan klasifikasi</p> <p><i>CLO-4. Able to apply computational techniques and to use modern computer tools/software used in machine learning for predictions of regression and classification.</i></p>	<p>dan Metode ML lainnya</p> <p>4.10 Dapat menyelesaikan kasus regresi dengan menggunakan metode SVR, Random Forest, dan Metode ML lainnya</p> <p><i>4.9 Can identify regression problems that are solved by SVR, Random Forest, and other ML Methods</i></p> <p><i>4.10 Can solve regression cases using the SVR method, Random Forest, and other ML methods</i></p>				
	Dapat menggunakan <i>software</i> (terutama <i>library</i> di <i>open source</i> , misalkan di R) untuk regresi	Observasi, Aktifitas di Lab <i>Observation, Activities in the Lab</i>	Praktikum <i>Practice</i> P: 2 x 1 x 170"		Menerapkan JST menggunakan software dan coding pada data	5% / kum 80%

		menggunakan SVR, Random Forest, dan Metode ML lainnya  <i>Can use software (especially libraries in open source, for example in R) for regression using SVR, Random Forest, and other ML Methods</i>					
15	CPMK-5. Mampu menerapkan teknik komputasi dan menggunakan perangkat komputer modern yang diperlukan dalam <i>Machine Learning</i> untuk peramalan deret waktu.  <i>CLO-5. Able to apply computational techniques and to use modern computer tools/software used in machine learning for time series forecasting.</i>	5.1 Dapat melakukan pemodelan dan peramalan data deret waktu dengan JST, SVR, dan metode ML lainnya  5.2 Dapat melakukan pemilihan input (feature selection) untuk meningkatkan akurasi kinerja model peramalan dengan ML  <i>5.1 Can perform modeling and forecasting of time series data with ANN, SVR, and other ML methods</i>	Tes lisan, observasi Aktifitas di kelas  <i>Oral test, observation Class activity</i>	CILSD, PBL  <b>TM: 1 x 2 x 50"</b> <b>PT: 1 x 2 x 60"</b> <b>BM: 1 x 1 x 60"</b>		1. Membangun model ML untuk peramalan deret waktu 2. Evaluasi kinerja model peramalan 1. <i>Building an ML model for time series forecasting</i> 2. <i>Evaluation of forecasting model performance</i>	5% / kum 85%

		<i>5.2 Can perform input selection (feature selection) to improve the performance accuracy of forecasting models with ML</i>					
16	<p>CPMK-1. Mampu memahami konsep supervised dan unsupervised pada pembelajaran mesin (Machine Learning) dan aplikasinya di berbagai bidang.</p> <p><i>CLO-1. Understand and able to explain the concept of supervised and unsupervised in machine learning and its application in various fields.</i></p> <p>CPMK-2. Mampu mengidentifikasi, memformulasikan,</p>	<p>Dapat menuliskan laporan hasil analisis dari <i>project</i> yang diberikan</p> <p><i>Can write a report on the results of the analysis of a given project</i></p>	<p>Laporan hasil kerja</p> <p><i>Work report</i></p>	<p><b>BM: 1 x 3 x 150”</b></p>		<p>Mengerjakan project dan menulis laporan</p> <p><i>Work on projects and write reports</i></p>	<p>15% / kum 100%</p>

	<p>dan menyelesaikan masalah statistika menggunakan machine learning.</p> <p><i>CLO-2. Able to identify, formulate, and solve statistical problems using machine learning.</i></p> <p>CPMK-6. Mampu menyajikan hasil penelitian dalam bentuk laporan tertulis.</p> <p><i>CLO-6. Able to write a written report of the analysis obtained from project.</i></p>
