Deskripsi Mata Kuliah <i>Description of Course</i>	<p>Pada mata kuliah ini, mahasiswa akan mempelajari analisa data GNSS. Serta, analisa data GNSS tersebut dihubungkan dengan kejadian bencana alam seperti gempa dan gunung meletus. Hubungan tersebut dilihat sebelum, saat, dan setelah kejadian bencana. Selain itu, data GNSS tersebut juga diturunkan untuk mendapatkan dan menganalisa data ionosfer dan troposfer dengan pemograman secara manual</p> <p><i>In this course, students will learn how to conduct analysis from GNSS data. Further, the analysis is linked with several natural disaster events including earthquake and volcanic eruption. The links are considered before, during, and after the event. Besides that, the GNSS data is derived to obtain and analyze ionosphere and troposphere data using manual programming.</i></p>
