

5. MO18-5201 Coastal and Marine Structures Design

Module name	Coastal and Marine Structures Design
Module level, if applicable	Master
Code, if applicable	MO18-5201
Subtitle, if applicable	-
Course, if applicable	Coastal and Marine Structures Design
Semester	2 nd Semester
Person responsible for the module	Ir. Handayanu, M.Sc., Ph.D Yoyok Setyo Hadiwidodo, S.T., M.T., Ph.D
Lecturer	Ir. Handayanu, M.Sc., Ph.D Yoyok Setyo Hadiwidodo, S.T., M.T., Ph.D
Language	Indonesian
Relation to curriculum	Mandatory course for master degree program in Ocean Engineering, 2 nd semester.
Type of teaching, contact hours	Lecture, <50 students 150 minutes x 16 weeks per semester
Workload	7. Class, $3 \times 50' = 150$ minutes per week 8. Independent Study, $3 \times 60' = 180$ minutes per week 9. Structured Activities, $3 \times 60' = 180$ minutes per week
Credit points	3 CREDITS ~ 4.8 ECTS CREDITS \times 1.6 ECTS
Requirements according to the examination regulations	A student must have attended at least 80% of the lectures to sit in the exams.
Recommended prerequisites	-

Learning outcomes and their corresponding PLOs	<p>CLO.1. Able to apply all primary design concepts of offshore structures in design of fixed offshore platforms.</p> <p>CLO.2. Able to understand the important factors in development of offshore oil and gas marginal field with appropriate novel concept of offshore platforms.</p> <p>CLO.3. Able to explain the consequences of applying the jacket fixed offshore platforms in deepwater area</p>	<p>LO.3. Able to propose complex designs and analyze them using logical thinking by considering standards, codes, rules, regulations and recommended practices</p>
Content	<p>This course provide relevant studies related to the design concept of coastal and marine structures for coastal and deepwater area by considering several important parameters as the consequences. Several analysis of coastal and marine structures are also described. Following subjects will be discussed in this course:</p> <ol style="list-style-type: none"> 1. Design concepts of offshore platforms 2. Offshore platforms and oil and gas marginal field 3. Environmental loads on offshore platforms 4. Design of tubular joints 5. Fixed offshore platforms in deppwater area 6. Dynamic analysis of offshore platforms 	
Study and examination requirements and forms of examination	<ul style="list-style-type: none">  In-class exercise  Assignment  Mid-term exam  Final exam 	
Media employed	<p>Offline: LCD, whiteboard, PowerPoint presentation</p> <p>Online: websites (myITS Classroom), Zoom, Microsoft Teams, PowerPoint presentation.</p>	
Reading list	<p>Main:</p> <ol style="list-style-type: none"> 1. Dawson, T. H., <i>Offshore Structural Engineering</i>, New Jersey, Prentice-Hall, 1983. 2. Chakrabarti, S. K., <i>Handbook of Offshore Engineering: Vol. 1 & 2</i>, New York, Elsevier, 2005. 3. Lloyd's Register of Shipping, <i>Stress Concentration Factors for Simple Tubular Joints: Assesment of existing and development of new parametric formulae</i>, OTH 354, London, THE-OTR, 1997.

<p>Bahan Kajian</p> <p><i>Study Materials</i></p>	<p>Dalam mata kuliah ini mahasiswa akan mempelajari pokok-pokok bahasan sebagai berikut:</p> <ol style="list-style-type: none"> 1. Konsep desain struktur bangunan laut 2. Anjungan lepas pantai untuk ladang migas marginal 3. Beban lingkungan pada anjungan lepas pantai 4. Desain sambungan tubular 5. Anjungan terpancang pada laut dalam 6. Analisis dinamis pada bangunan laut <p><i>The students will get the following materials:</i></p> <ol style="list-style-type: none"> 1. Design concepts of offshore platforms 2. Offshore platforms and oil and gas marginal field 3. Environmental loads on offshore platforms 4. Design of tubular joints 5. Fixed offshore platforms in deepwater area 6. Dynamic analysis of offshore platforms
<p>CPL yang dibebankan MK</p> <p><i>PLO</i></p>	<p>Mampu merumuskan pertanyaan penelitian baru untuk mengakomodasi pengetahuan multidisiplin untuk pengembangan teknologi di bidang desain dan konstruksi struktur laut</p> <p><i>Able to formulate new research questions to accommodate multidisciplinary knowledge for technology development in the field of design and construction of marine structures</i></p>
<p>CP-MK</p> <p><i>CLO</i></p>	<ol style="list-style-type: none"> 1. Mampu menerapkan semua konsep dasar perancangan bangunan lepas pantai pada perancangan jenis anjungan lepas pantai terpancang 2. Memahami faktor-faktor penting dalam pengembangan suatu ladang migas lepas pantai marginal beserta jenis anjungan yang sesuai 3. Mampu menjelaskan konsekuensi penerapan jenis anjungan terpancang di lingkungan perairan dalam <p><i>1. Able to apply all primary design concepts of offshore structures in design of fixed offshore platforms.</i></p> <p><i>2. Able to understand the important factors in development of offshore oil and gas marginal field with appropriate novel concept of offshore platforms.</i></p> <p><i>3. Able to explain the consequences of applying the jacket fixed offshore platforms in deepwater area</i></p>
